

Flint Trading Introduces...

TrafficScapes™

SURFACE SYSTEMS FOR ENHANCED SAFETY

TrafficScapes™ is a portfolio of preformed thermoplastic pavement marking materials engineered for durability, safety, and aesthetics for the streetscape and traffic calming market. The TrafficScapes™ group of products includes:

- **DecoMark® - Logos and Surface Signage**
- **DuraTherm® - Inlaid Crosswalks and Traffic Calming Surfaces**
- **TrafficPatterns® - Surface-Applied Crosswalks and Traffic Calming Surfaces**
- **TrafficPatternsXD™ - Heavy-Duty Stamped Crosswalks & Traffic Calming Surfaces**

Each product offers its own unique application and performance approach to streetscape projects where shared roadway safety and aesthetic appeal need to work in conjunction. Contact Flint Trading today at 336.475.6600 to find out which product suits your needs.

Maximize traffic guidance, reduce sign clutter, increase brand awareness, enhance community pride, and promote school spirit with durable preformed thermoplastic horizontal surface signage that is engineered to last 6 to 8 times longer than paint, and even longer in areas with only pedestrian traffic. DecoMark® design and color combinations are virtually endless.

LOGOS & HORIZONTAL SURFACE SIGNAGE

Whether a basic two-color directional message or a multi-colored custom logo, each design begins with a CAD drawing linked to a stringent manufacturing process. At the time of installation, the applicator will find pre-cut sheets of interconnected material with application instructions and a diagram for proper layout. Available in 90-mil and 125-mil thicknesses, the sheets of DecoMark® material are easily lifted and positioned onto an asphalt or concrete surface for application with a propane heat torch or large heater.

DecoMark[®] is surface applied and does not alter or impair the substrate. Application does not require expensive capital equipment, customized tools, templates, or grids. DecoMark[®] provides extensive uses at many places:

USES:

- Custom Logos
- Sidewalk Accents
- Directional Markings
- Informational Markings
- Trail Markings
- Toll Lane Markings

LOCATIONS:

- Streets and Highways
- Business Parks
- Parking Lots
- University Campuses
- Driveways
- and more...

HIGH SKID/SLIP RESISTANT FOR SAFETY

- Anti-skid elements, added during manufacturing, ensure skid resistance is maximized, especially in wet conditions. Retroreflective glass beads can be added if signage is used as a traffic control device in compliance with the MUTCD.
- The material is flush across the surface so there are no tripping hazards.

ACCESSIBILITY

DecoMark[®] is surface-applied and has the same surface characteristics as the pavement. Therefore, there is no rigid bumpy effect as with imprinted products.

MANUFACTURING CONTROL

All DecoMark[®] preformed thermoplastic materials are made at Flint's manufacturing facility which is ISO 9001:2008 certified for design, development and manufacturing. Quality, value, and long-term performance are built into the marking.

STANDARD COLORS

| | | | | | | |
|------------|----------------|--------------|-----------|-------------|----------|--------|
| White | Yellow | Orange | Lt. Green | Green | Red | Purple |
